Dubai: Two Asians were killed and one seriously injured in a road accident on Dubai Bypass Road on Monday.

The driver and the front seat passenger were instantly killed as they crashed into a truck at around 11:30am, according to the traffic department.

Based on preliminary investigations it is believed the accident was caused by the speeding of the pick-up and for not leaving enough space between the vehicle and the truck.

The truck was parked in the road after being involved in a minor accident earlier, when the incoming speeding truck hit it from behind.

The Pakistani motorist and the Chinese man in the passenger's seat of the pick-up were killed while a third Chinese man sustained serious injuries.
